**ECCV 2010: Workshop on Reconstruction and Modeling of Large-Scale 3D Virtual Environments**

The workshop will take place on September 11th, in Crete, Greece, in conjunction with the ECCV 2010 main conference. It will be a one-day forum where every accepted paper will be orally presented. The nature of the workshop is multi-disciplinary, focusing on innovations in all the technology and application aspects of modeling and representation of large-scale 3D environments.

**Agia Napa Summer Seminar, July 2006**
The seminar will provide a forum for some of the leading researchers in computer graphics to present their ideas and vision. It will bring together applications and basic research and consider the requirements of systems, interfaces, and efficient algorithmic solutions to be developed. The main goal of the seminar is to provide an opportunity for discussing ideas and work in progress. International conferences with their densely packed schedules usually leave little room for this sort of scientific exchange.
